SUMMARY

Motivated Computer Science student with strong experience building clean, functional web interfaces using HTML, CSS, JavaScript, and JSON-based systems. Skilled at creating dynamic content loading, interactive UI components, and Node.js-powered backend logic. Passionate about building efficient, user-focused applications and continuously improving through real-world projects.

SKILLS

HTML, CSS, JavaScript (ES6) | JSON-based dynamic systems | Node.js basics & API integration | UI/UX fundamentals | Debugging & website maintenance | Git & version control

EXPERIENCE

- Freelance Web Developer – Designed responsive landing pages and portfolio sites.
- Fixed JavaScript, layout, and responsiveness issues.
- Built interactive UI components and JSON-driven loaders.
- Maintained and improved existing websites for performance.

PROJECTS

- Portfolio Website – One-page responsive portfolio with horizontal auto-scrolling JSON-powered slider.
- Dynamic Recipe App – Admin approval system using JSON storage and Node.js backend logic.
- Comic Reader Platform – Dynamic chapter-loading system using external HTML chapter files.
- Landing Page Designs – Optimized CTAs, responsive UI, integrated forms.

EDUCATION

- B.Sc Computer Science — Abubakar Tafawa Balewa University, Bauchi (Enrolled)
